

British Education Studies Association Colloquium
*In association with the Institute of Education &
The Centre for Learning and Teaching at Manchester Metropolitan University*

Towards Research-Informed Teaching
Friday 21st November 2008
Guest Speaker: Professor Mick Healey University of Gloucestershire

British Education Studies Association (BESA)

BESA was set up in 2005 to provide an academic community for all those working in Education Studies. A BESA colloquium provides opportunities for more informal sharing of good practice.

Location

The colloquium will be held in the Geoffrey Manton Building at the All Saints Campus of Manchester Metropolitan University, close to the city centre. With 33,000 students MMU is one of the largest providers of higher education in the UK. MMU is working to ensure that research activity strongly influences the curriculum and that research-informed teaching is deeply embedded in its academic practice

Colloquium theme – Towards Research-Informed Teaching

‘A learning environment informed by research provides learners with an understanding of knowledge creation (the research process and research methods) and its application (in economic, social, health and global contexts). It also stimulates key skills of critical analysis, respect for evidence and informed decision-making.’¹

This colloquium will explore what is meant by ‘Research Informed Teaching’ and will allow participants to present and share good practice in an informal atmosphere. The colloquium will be a mix of keynote presentation, workshop, poster and case studies and will highlight ways forward in promotion of good teaching practice through links with research. The colloquium is open to people from all disciplines in HE. You are welcome to submit posters and case studies. For a registration form please visit <http://www.educationstudies.org.uk> or contact l.mackay@mmu.ac.uk The registration fee is £75, to include all sessions and refreshments throughout the day.

Posters and examples of good practice are welcome.

¹ *HEFCE (2006) Teaching Quality Enhancement Fund. Funding arrangements 2006-07 to 2008-09 at http://www.hefce.ac.uk/pubs/hefce/2006/06_11/06_11.doc
